

# HEALTHY SLEEP

*- it's a tree story:*

# TEAM 7

**WE WORK  
HAND IN HAND  
WITH THE WORLD'S  
BEST DESIGNER:  
NATURE.**

*- it's a tree story.*

## WE LOVE WOOD.

*Georg Emprechtinger,  
Owner and Manager of TEAM 7*

The starting point for sensible use of resources is a sustainably managed forest, which regrows continuously under the power of the sun. With the greatest care and attention to detail, we work the fine, European hardwood into unique pieces of furniture that share with you our love for wood in every little detail. Sustainability, responsibility and commitment to creating value in harmony with humans and nature shape the way we think and act at TEAM 7.

## *Grown for you.*

Because we grow our own 74 hectares of forest we understand the great value of wood and how important it is for sustainability. That's why we make all our furniture from deciduous trees that have been growing for decades in sustainable forestry. Finished exclusively with pure, natural oil, the wood surfaces of our furniture promote a naturally healthy and comfortable climate in your home. They are very easy to care for – and to restore, if necessary. This means TEAM 7 furniture retain their original and beautiful character for many decades.

## *Designed for you.*

*Your restful sleep is our goal. To make sure you get a comfortable and healthy night's sleep, we go beyond conventional standards and work on holistic solutions. Our bed joints are completely metal-free and our sleeping system is made of natural materials.*

*First the design and then the interior: our consultants plan according to your ideas and spatial possibilities. The model, size, wood type and colours are first planned to fulfill your wishes and only then do we start producing your customised TEAM 7 furniture.*

## *Made for you.*

*We do not make furniture to stock, but rather to fulfill our customers' wishes. Developed by designers, planned in accordance with your wishes by trained interior architects and realised by master carpenters: our award-winning solid wood furniture draws upon traditional Austrian handicraft skills. Each piece of furniture is a unique item, made to measure and requiring much skilled handwork. And the best thing about it –*

*TEAM 7 furniture is available for all living areas.*

# HEALTHY SLEEP FROM A TO ZZZZ.

*- it's a tree story.*

+

+

## *solid wooden bed*

We guarantee that there is one thing you won't find in any of our bed joints: metal. This is how we prevent the strengthening of existing magnetic fields. Our solid wooden beds also ensure a healthy room climate and – as an added bonus – regulate the humidity in your bedroom.

## *aos sleeping system*

We give it all for your healthy sleep: ergonomically precise body support, optimal ventilation and natural, healthy materials. In brief: our **aos** sleeping system.

## *sleep accessories*

Our customisable, ergonomic pillows provide optimal support to your spine. And, thanks to their natural materials, our blankets regulate the sleep temperature and climate.

*Our whole focus is on ensuring optimum sleeping comfort for you. We do this with our healthy solid wooden beds but also everything else that goes with it: an ergonomic sleeping system made of natural, anti-bacterial materials and high-quality accessories.*

*Our **riletto** bed has received the Red Dot Design Award and was created by the designer Kai Stania. The connection between the headboard and the bed is made of solid wood and a central design element. Recessed slides give it the appearance of floating. The headboard and sides of the bed can be fabricated in leather or solid wood.*

## SLEEPING IN NATURE – NOW ALSO FOR THOSE WHO HATE CAMPING.

*– it's a tree story.*

### *riletto*

The **riletto** bed can be enhanced with stylish consoles if desired. The love for detailed craftsmanship is apparent here: The attachment consists of a joint made exclusively of wood. The consoles can be used as practical trays and are also available with an integrated drawer.

## *riletto*

The harmonious interplay of solid wood and leather is characteristic of the entire **riletto** line. It can also be seen in the accessories, which are available with bases or as wall attachments. The fronts have touch fittings that eliminate the need for handles.

*riletto*

Thanks to its slender dimensions, even the version of our **riletto** bed that comes with wooden sides and a leather headboard has that special floating appearance. Smoothly rounded surfaces give the solid material of the side sections a soft look and feel, while literally emphasising the beauty of its solid wood. In perfect unison with this are the matching **riletto** bedside cabinets with their typical leather sides.

*Their soft leather sides and handle-free design provide our **riletto** dressers with their clean, pure look.*

*The relief wardrobe is a masterpiece of craftsmanship – from the inside as well as outside.  
With its fascinating material mix of glass and wood, it makes a vivacious impression when it is closed.  
This interplay gets a particular intensity from the millings that run perpendicular to the wood grain.  
On the inside, in contrast, it is clearly structured by practical organisational aids.*

**NO MATTER  
WHAT THE LATEST  
FASHION,  
TIDY STORAGE IS  
ALWAYS EN VOGUE.**

*- it's a tree story.*

Everything in order. An extensive and functional interior ensures comfort and a better overview of your wardrobe. Interior drawers with dividers of different sizes and optional interior lighting help to find the right style of matching combinations of items quickly and easily.

Block of solid wood

# WE ARE DEDICATED TO CREATING FURNITURE THAT'S JUST AS UNIQUE AS WOOD ITSELF.

*- it's a tree story.*

## *Sustainability & design*

Even if it sounds unconventional at first: our sustainability already starts with the design. Because wood is naturally robust, resilient and durable – in contrast to so many trends. This is why our designers are carefully considering what the trends for living are that will stand the test of time and have what it takes to become classics. After all, the design of our furniture is just as timeless as the material from which it is made.

*The flush-mounted folding handle is integrated smoothly into the solid wood fronts of our **nox** occasional furniture and ensures easy operation of the generous drawers.*

## ***nox***

The rounded bed sides with their S-shaped edges are characteristic of our **nox** bed. At the corners, the visible wooden connections combine to form an elegant S-line. Recessed foot panels give this piece – designed by Jacob Strobel – a floating appearance. The headboard is available in solid wood or as an upholstered board in leather.

# WE ARE OUR OWN TOUGHEST INSPECTORS.

*- it's a tree story.*

The ingenuity of nature is the inspiration behind our constant drive to find new solutions for greater functionality and comfort. We implement them with our signature attention to detail and perfect craftsmanship, that's what makes our kitchens and furniture so extraordinary. Numerous patents and utility models underline the innovative power of TEAM 7. This means that, in the development phase itself, we comprehensively test the function, ergonomics, stability and safety of our products in our own laboratory, over thousands of cycles. TEAM 7 furniture is always made to order – with perfected technology and function.

## *NOX*

Our **nox** bedroom furniture, in wild natural oak and wild walnut wood, shows off its hand-selected natural wooden surfaces particularly effectively. The strong grains and visible bases of branches in this range emphasise the natural charm of the living material.

## *NOX*

The elegant S-line of the corner joints and edges gently rounded let you feel directly the skilled workmanship that has gone into making the **nox** dresser. Pure solid wood in the thickness typical for **nox** ensures your bedroom has a pleasant and snug atmosphere.

## *nox*

A big sliding door made of solid wood, which impresses with its high material strength, is the heart of the **nox** cabinet. It can be smoothly moved in both directions and comes softly to rest in the centre.

mylon bed

## *mylon*

In 2015 the designer Jacob Strobel reinterpreted the classic four-leg bed – and gave it an elevated, seductively slim appearance. The version with the delicate upholstered headboard in fabric or leather moves the fine wood construction even more into the spotlight. The cover of the upholstered headboard and the bed sides are removable – for easy cleaning as well as a change of material or colour.

*In our cubus pure accessories, elegant and homogeneous surfaces made of coloured glass mingle with vibrant and beautiful solid wood.*

*soft*

The **soft** hinged door wardrobe is a spacious piece of craftsmanship. And the best thing about it – you can adapt it to your own preferences. Select your individual mix of coloured glass and solid wood and plan the interior just as you like. The optional mount with LED lighting perfectly illuminates your finished masterpiece.

**WE TAKE  
THE MOST DIRECT  
ROAD TO  
ENVIRONMENTAL  
PROTECTION.**

*- it's a tree story.*

*Conservation  
of resources*

Shopping with the right attitude. Contrary to the current trends toward global sourcing, we have always relied on regional partners and suppliers. This ensures short transport routes and avoids unnecessary emissions of harmful substances.

*mylon bed*

## *mylon*

Design your **mylon** bed however you like.  
For example in the version with the slatted headboard, which has soft internal curves that create an exciting contrast to the clear linear design of the bed. Its counterpart, the optional footboard, is just as beautiful.

**OUR NATURAL OIL  
PROMISES  
ETERNAL YOUTH.  
SADLY, ONLY  
FOR FURNITURE.**

*- it's a tree story.*

The pleasant feel of our oiled wooden surfaces is a real treat and you are sure to be won over by their everyday practicality, from simple, daily cleaning to minor repairs. This is because even dents and scratches can be easily repaired with open pore treatment. Treated every 1-2 years with natural oil, the wooden surfaces will retain their beauty for a long time.

Your furniture can always be fully up to date in terms of flexibility as well: our follow-up purchase service ensures you have the option to buy any additions and extensions to your furniture elements for years to come.

OUR BEDS CONTAIN  
JUST AS MUCH METAL  
AS A TREE. IN OTHER  
WORDS, NONE.

*- it's a tree story.*

### *sesam*

This is what a connection for life looks like: traditional, metal-free wooden connections, resilient craftsmanship and pure solid wood. Our **sesam** bed is optionally available with three different headboards and a footboard.

## *sesam*

The **sesam** bed is best accompanied by the bedside cabinets and chest of drawers from the same range. Different types of wood and models allow for wide freedom of design and mean that we can cater to your personal storage needs.

## *lunetto*

The **lunetto** bed seems frail and light, but appearances are deceptive: Although the delicate widths of the material make the design seem particularly light, the sophisticated and traditional wooden connections ensure the highest stability. **lunetto** is optionally available with a wood or leather headboard. For the most elegant look of all, we also offer night stands in matching heights for your **lunetto** bed.

## *lunetto*

The transverse solid wood grain and the intriguing contrast to the centre panel of coloured glass are characteristic features of the **lunetto** hinged door wardrobe. The appearance is rounded off by the handle: either an elegant angled strip of natural wood or a cubic stainless steel bar.

## AN ALL-ROUNDER THAT WE USE FOR EVERYTHING.

*- it's a tree story:*

### *Workmanship*

Wood is a very special material. It is especially healthy, especially durable and especially pleasing to the eye. That is why working with this wonderful material is also very special: our designers and master cabinetmakers know just how to process it according to type and to make use of its advantages to optimum effect in different living areas. The entire production process is just as natural as the material. Working with wood means one thing to us above all: a special honour.

## *valore*

The clear design and an elegant material thickness are the trademarks of our **valore** bed. You have a choice of headboards: horizontal rungs, relief, leather, or no headboard at all – it's up to you!

## *valore*

The folding handles on our **valore** bedside cabinets are elegant as well as practical and are available in solid wood or stainless steel options. The bedside cabinets are available in open form, with a storage compartment or with one or two drawers. Select your preferred model from three widths and two heights to match your bed. And it's the same with the **valore** dresser: We will be glad to build it for you in different heights, widths and drawer heights.

## AT HOME IN NATURE.

*- it's a tree story.*

### *Room climate*

You are treating yourself well in many ways when you choose furniture made of solid wood: wood makes a home snug and warm. With its open-pored surface, refined exclusively with pure natural oil, TEAM 7 furniture is breathable. Natural wood absorbs moisture and then releases it again. This promotes a healthy room climate and humidity level in your home. Our natural furniture is also anti-static, which is beneficial especially in case of dust allergies. The scientifically proven anti-bacterial effect of natural wood surfaces also has hygienic benefits.

# AOS – THE ART OF SLEEP

While you are sleeping, your body is still working. This is because night time is when it regenerates. We make great demands on our spine during the day and this causes the intervertebral discs to lose fluids. When you lie down properly, they are relieved. Then they can fill up and regenerate again. An optimal lying position is very important in this process. A sleeping system has to support the spine in the right places while yielding in other areas. Which areas those are depends on the position you are sleeping in. That is why our integrated, ergonomically designed **aos** system takes your individual needs into account. It is the ideal complement for our solid wood beds and consists of an insertion frame, spring element, mattress and slip cover. The **aos** components are made of natural and renewable resources: wood, natural latex, cotton, sheep's wool, TENCEL® and maize fibre. For everyone whose one wish is a good night's sleep: it will be a very good one with **aos**.

## *topper*

The optional **aos** mattress topper provides unique comfort.  
height **6 cm**

## *mattress*

The **aos** mattress consists of 100% natural latex derived from the sap of the rubber tree.  
height **10 cm**

## *spring element*

The **aos** spring element has an intelligent construction that adjusts to various sleeping positions throughout the night. It makes sure that the pressure is distributed properly and provides the best possible support for your spine.  
height **12 cm**

## *insertion frame*

Just like the rest of the sleeping system, the stable **aos** insertion frame is 100% metal-free. Alternatively there is an electrically adjustable slatted frame with remote control.  
height **4 cm | 8 cm**

FEEL  
AS LIGHT AS A  
FEATHER.

### *spring element*

We turn our bodies up to 80 times per night – that is how often a sleeping system has to adjust to our new position. The **aos** spring element, an ergonomic masterpiece from our manufactory, satisfies this requirement. It can adjust to the various sleeping positions thanks to its intelligent construction and provides precise support to your body, whether you lie on your back, side or stomach. Seven latex strips covered in cotton – with sophisticated structural positioning – and rimellas made of elastic ash ensure

a perfect adjustment to the body. The rimellas can be supplemented or removed individually so that the sleeping system can be customised for everyone. Its ribbed surface and construction from individual components provide a healthy ventilation of the spring element, which is held together across the width by special clamping slats.

And the best thing about it – you will sleep so well on this that you won't even notice all these details.

## *mattress*

Our **aos** mattress only gives in where a force is applied. This ensures optimised pressure relief and an ideal blood circulation for those who are sleeping on it. The mattress owes this positive feature to the material that is made from: 100% natural latex – available in soft or firm versions. It is attached to the **aos** spring element with a zipper.

## *insertion frame*

A healthy foundation. The **aos** insertion frame is 100% metal-free, extremely stable and optionally available in spruce or Swiss pine. The latter is known for its beneficial effects on promoting healthy and restful sleep. In addition to having a pleasant scent, the essential oils of the Swiss pine are also proven to calm the heart. For even more comfort, the insertion frame is also available as an electric version including a mains cut-off: here the motors are integrated elegantly into the lateral bars and the slatted frame can be controlled wirelessly with a remote control.

## *slip cover*

In natural packaging. The **aos** slip cover is a unifying feature, combining the spring element and the mattress into a compact system. Its removable cover is made of 100% pure cotton, quilted with natural and self-cleaning sheep's wool. Of course you can also opt for the washable version made of TENCEL®/maize. A specially designed weave on the underside guarantees optimal ventilation and a pleasant sleeping climate.

### *topper*

Top material. The optional **aos** mattress topper provides restful comfort. It consists of high-quality Talalay latex. This material is made with a clever trick: Natural latex is frozen before baking, which results in an open-pored surface rather than an impermeable layer. And this brings a great advantage

for a healthy sleep climate: Body heat and moisture can quickly be absorbed and released again through the pores.

## *classic mattress*

Enter the comfort zone! Or, actually, the comfort zones. Because the elastic, breathable latex core of our **classic** mattress excels with its seven zones. With this special division into the shoulder, pelvis and foot areas, we achieve pressure relief that is precisely conformed to your body and thus creates ergonomically healthy sleeping comfort. A sophisticated sectioning of the surface allows for flexible adaptability and contributes to optimal ventilation. The **classic** mattress is comfortable even during cleaning: Its cover is made of high-quality, natural cotton that is woven with breathable, temperature-sensitive fibres – it is easy to remove and washable.

*classic natural latex 21*  
100% natural latex  
degree of firmness:  
medium-firm or firm  
total height 21 cm

*classic latex 21*

## *accessories*

The sleep climate has a considerable influence on your restful sleep: If it is too hot or cold, the body has to react and balance out the temperature. This is stressful for your body and interferes with its regeneration. That is why we make sure that our covers are made of especially temperature- and moisture-regulating materials. Your sleeping pleasure is enhanced even further with our pillows, which can adapt to your needs and support an ergonomic lying position.

# WE SET AN EXAMPLE WHEN IT COMES TO THE ENVIRONMENT. GUARANTEED.

*- it's a tree story.*

The Austrian ecolabel is a mark that guarantees healthy living – free of harmful substances. Tested by an independent testing body according to strict standards, this mark confirms that our furniture is not harmful to the environment or to health. It confirms that the wood used in our furniture comes from sustainably harvested forests and promotes a healthy living environment due to its special surface treatment. The Austrian ecolabel is also a quality mark for high-quality products that excel due to their long life, suitability for use as well as safety and comfort in daily use.

The EMAS certificate provides proof of our sustainable production methods, efficient use of resources as well as compliance with applicable environmental laws. As an ISO-certified company, we are committed to the implementation of international standards and the associated requirements related to the environment, quality and safety.

Sustainability is an important factor in all of TEAM 7's activities. That's why we make sure that we use environmentally-friendly production methods and materials – also for making this catalogue. We aim to save resources and use materials that are free from harmful substances. The paper used for this catalogue comes from forests that are managed on an environmentally, economically and socially sustainable basis. We have used only renewable energy and pure vegetable-oil-based printing ink for the print production.

SINCE  
1959

## *our types of wood*

*We make all our solid wood furniture from the wood of leafy green trees  
grown in controlled and sustainable forestry.*
