## PIURE

How to satisfy the highest demands on design and quality? We have decided to omit the average. Everything that is not well thought out. Everything that does not relate to the latest status of technology. Yes, even everything that is “only” good. Until the best remains: the pure form. The pure joy.

As a manufacturer of systems we not only produce systems – we also have one. In our mind. With answers for questions like the following: Is the design of the furniture accomplished? Is it puristic and subtle at the same time? Is it plain but still sensual? Is the quality of the finish perfect? Can the furniture become favourite furniture – for a very long time? Do they offer a huge range of combination possibilities and functions? Are our manufacturing methods as always the most-modern ones? Is “Made in Germany” important to us? Do the forests remain beautiful while we embellish living rooms? Do we have all important certificates?

Our system has an answer for all these questions: yes. A pure and clear word with three letters. The reduction to the best – these goals we not only pursue with regard to furniture, we sometimes reach it also with the alphabet.

Curtain up.

## NEX SIDEBOARD

The Nex Sideboard is like a beautiful film actress. A star who always acts sophisticated. The special trade is the wafer-thin cover plate which is mitred and only 5 mm thick. The basic element for the Nex Sideboard is available in many widths, depths and heights. With doors, flaps, drawers or open. The different boxes are put next to each other or stacked. But united with a continuous, delicate plate that creates a calm picture. The mitred corners are connected by an elaborate process. The bodies are available in different matt lacquer colours, the fronts, cover plates and sides additionally in high-gloss lacquer and different woods.

The Twin-Box is a special element: a small drawer which is integrated in the corpus. Also smart: the divided side plate and the coloured cover plate. The drawer is available with grip-mould or handleless. The Nex Sideboard stands here like the main actor in the room. It also can be positioned in front of a wall. As an option either with base frame, runner frame or base-plate. Or wall-suspended.

Here two twin-boxes are connected with each other. The charm comes from the diversified cover plate. On the top beautiful accessories can be highlighted, in the drawer useful items hidden.

Here the grip-mould is in the same colour as the sideboard – however it can be chosen in any other colour. The bodies are available in different heights. If low or high, the Nex sideboard always catches the eye with its fineness.

The classic one for  
floating appearing  
sideboards. In alu, in  
chrome, or in the  
colour of your choice  
in matt or high-gloss  
lacquered.

## NEX BOX

Lets think of a circus actor. One who can be contortionist, weightlifter, knife-thrower and fire-eater at the same time. It is the same for the Nex Box and its huge collection. No desire remains open with its different boxes. The collection of Nex Box turns single boxes into creative sideboards or hanging wall-installations. They come in many different widths, depths, heights with doors, flaps, drawers, open or all combined. The boxes can be put next to each other, stacked or wall-mounted. At this point one word to precise the distinction between Nex Sideboards: Nex boxes are put next to each other and have one or more joints. Furthermore every box has a fine edging. Whilst the Nex Sideboard – no matter how many bodies are next to each other – feature a continuous cover plate and one fine edging. This means: A sideboard made of Nex Boxes is more flexible in its presentation and is more economically priced than the sideboard.

In the picture left you can see the Step-Box: The top-unit is made of thin aluminum and is adapted precisely. Also exchangeable – in case you want a coloured highlight any time later. The step is available in the middle or on the outside. Beneath there is a drawer or flap.

Nex Box offers doors and drawers but also open boxes - in many different widths, heights and finishes. Beautiful effects by combining matt lacquer and wood with different depths of the boxes.

Countless possible combinations due to eleven different heights, six widths and two different depths. The bigger the composition, the more exciting is the interplay between colour, form, material and volume.

boxes stand on one  
leg and not on two.

## NEX SHELF

There are performers who are recognized immediately: their transformability is not unlimited. The Nex Shelf includes elements which our designers have determined. However you can combine them with each other at your will. Like this numerous possibilities arise to make Nex individual: Piure-typical pure. Gracefully built but in difference to other PIURE shelves with double sides. The thin cross sections and high-gloss fronts give an elegant aura. Open elements and those with fixed fronts- drawers and doors – can be arranged according to your own taste and practical thoughts. To highlight the compartments you can add coloured inserts. You receive the Nex Shelf in two different depths, five-height elements and three widths.

The fronts create a subtle game of shadow gaps. The sides of the shelf elements merge discreetly. The high-quality surfaces and the perfect manufacturing are the main characteristics of Piure.

Maybe you need for tall illustrated books or an impressive vase higher compartments? Then we recommend an element which was planned as an open compartment. It stretches over two compartment heights and is ideal to give beautiful items its necessary space.

Exciting compositions result when wide open and closed shelves are combined with each other.

1

2

5

3

4

1

Equipped with modern technology: the perfectly processed drawers open by touch.

2

Behind every door a height-adjustable shelf is located. Also the side of the door stop can be chosen.

3

Open compartments over two levels: for the big and beautiful items.

4

Double sides result in two visual highlights.

5

The sides are made of steel, the back panels made of MDF. With coloured, lacquered inserts, surfaces can be highlighted.

## NEX CABINET

An actor with minimalistic play: Nex cabinet only needs a few characteristics to express itself. Its identifying features are the fine side plates of 5 mm. And the shadow gaps which result by the lines of doors and drawers. On the stage of your sleeping or dressing room the Nex cabinet plays the role of the classic wardrobe. You have the choice between doors and doors in combination with drawers. For further interior inner drawers, shelves with and without clothing rail, clothing lifts, mirrors and pull-out shelves. The fronts- just like the ledge and angular handles- are available in all colours in matt and high-gloss lacquer. The Nex cabinet is available in one fixed depth, three heights and four widths.

The delicate ledge handles in aluminum for the double-doors and drawers are equally wide in order to create a harmonized picture. How does this work? By dividing the handles for the double doors in the middle. Soft closing: All doors close with a damped self-closing.

Here you can see the minimalistic game of the shadow gaps in detail. For the variable cabinet element double doors with three outside drawers have been combined.

## LINE SIDEBOARD

The Line Sideboard is like an actor who can present almost everything. The unpitying king, the nervous lover or the fascinating clown. He can do everything. His trade is absolutely solid. To be precise: In the LINE system you can get every length, width, height, five front versions, a cut-out here, there three, and over there one extra - at exactly the position you need it to be. We could also say: everything, and even at the height you want. Because Line Sideboards are not only available in the standard height but also as a Lowboard and Highboard. You can either hang the sideboards on the wall, position them anywhere in a room, and if you decide for the standing version, choose one of seven different leg versions. As fronts, doors, drawers, flaps and open compartments in different heights and widths are for selection. Within one element you can arrange the fronts individually. These are available without handle, with or without revolving profile. Furthermore with a handle, which makes part of the profile. And finally as well with a seamlessly adjusted ledge or angular handle. The material of the surface can be chosen as following: matt lacquer, high-gloss lacquer, wood, clear glass as well as rear lacquered glass in matt or high-gloss.

Here you can see for example fronts in matt-lacquered glass and profile. For glass fronts there is also the option of a shining surface. Also, one has to make the decision if the fronts shall be with or without profile. This profile we can make in every colour you wish, or in alu and chrome. Small hint: the profile of high level workmanship gives the furniture a special luxurious touch. The coloured outline indicates – not only when opening – in a subtle way the quality.

The seamlessly milled in ledge handles demonstrate the finest technique. This emphasizes the clear lines. The double door handle is divided and has the same length as the drawers handle. Like this an even pattern of fronts is guaranteed. For the interior it is all up to you: With pull-out shelves, inner drawers and shelves we can make all dreams come true and guarantee an optimal storage use.

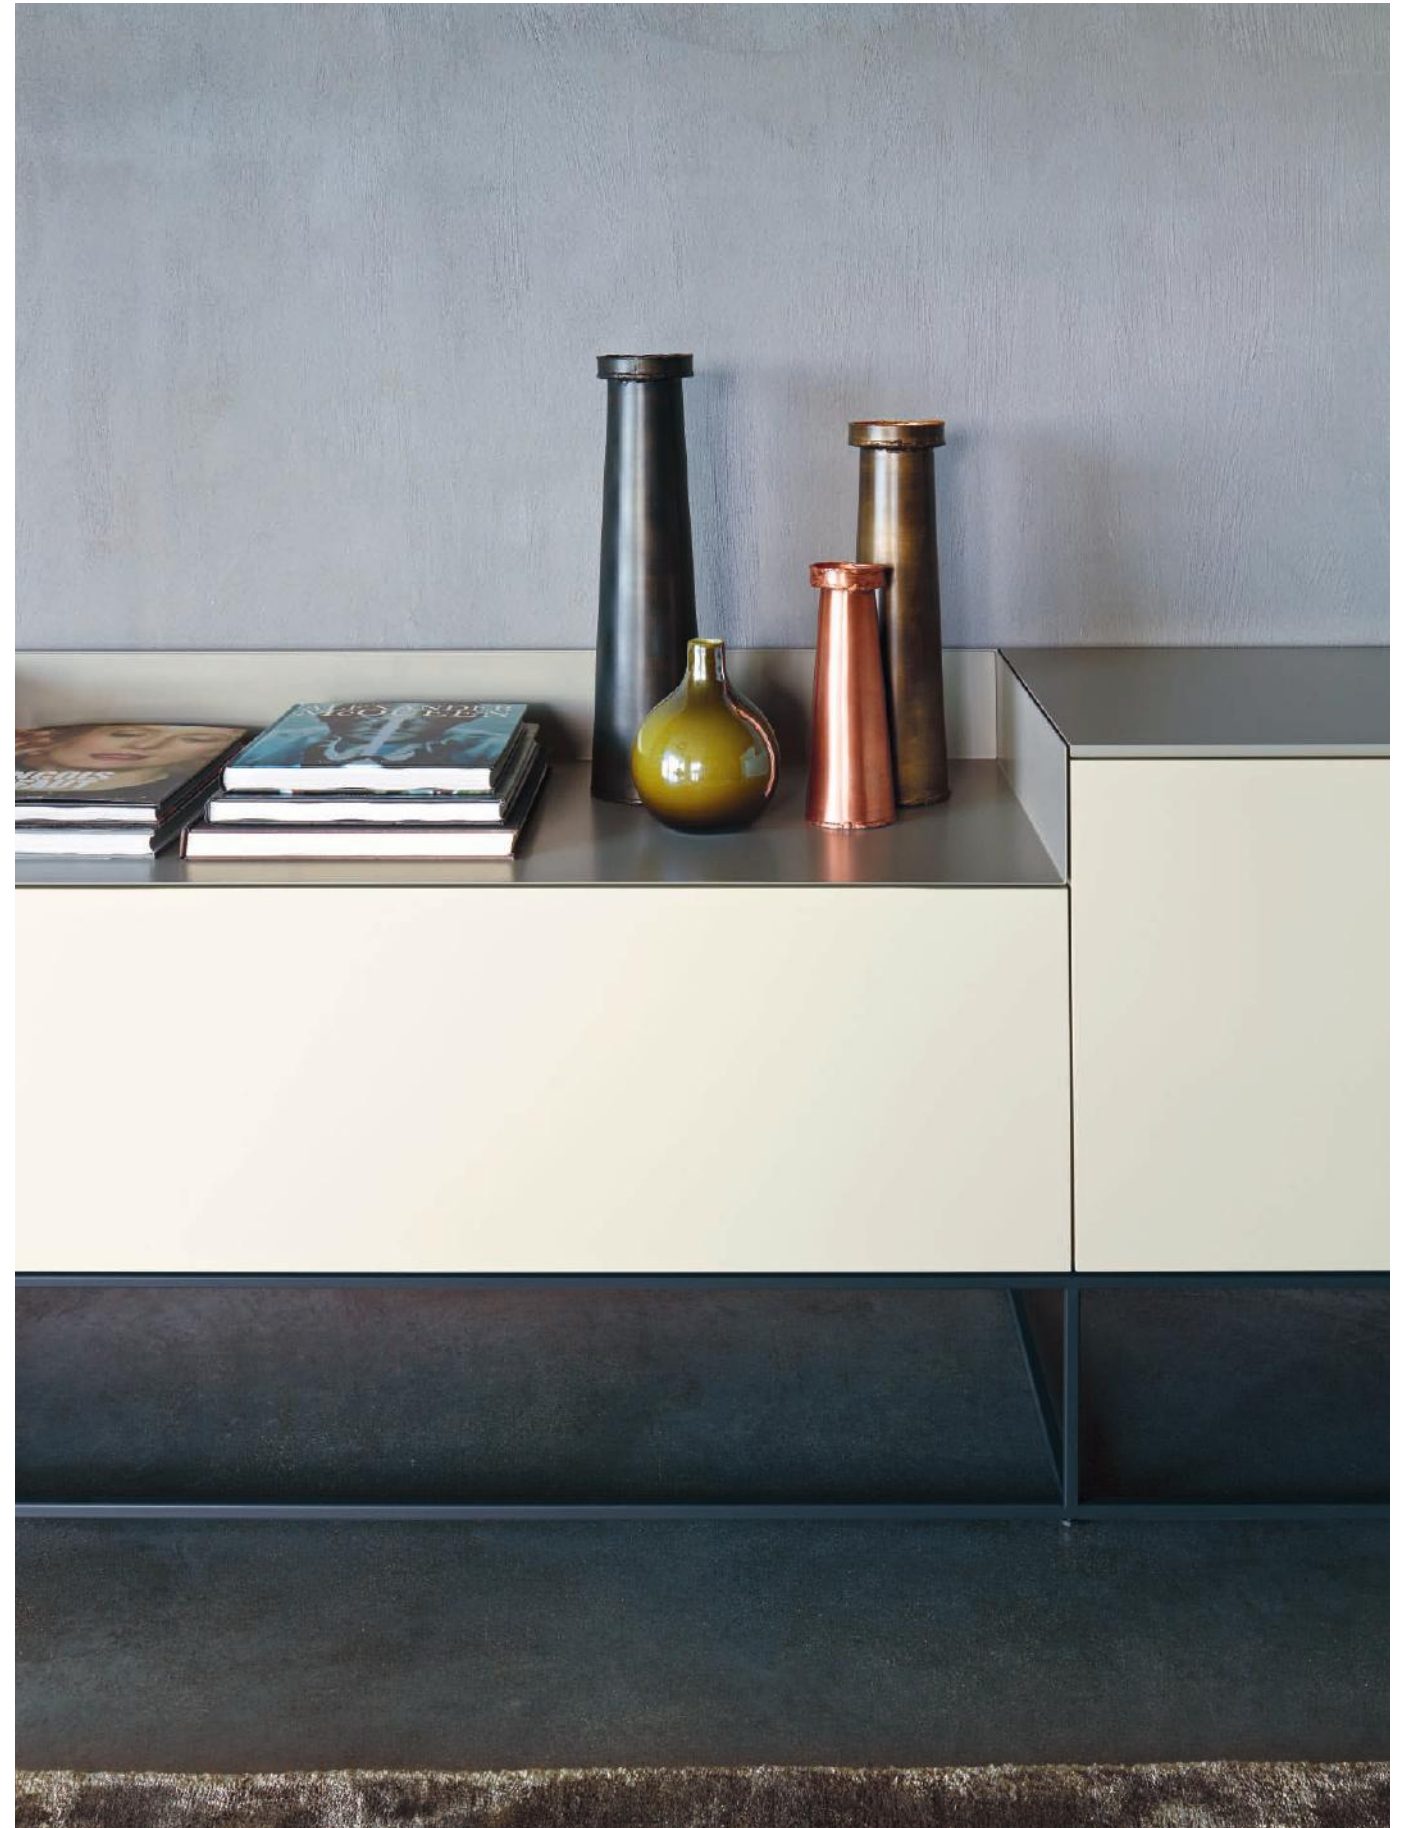

Aluminum does not always have to have the colour of aluminum. We offer the thin overlay made of aluminum in all colours. Like this single surfaces can be emphasized and an interesting, diversified impression is created.

This handleless sideboard carries a cover plate made of glass. Optionally in matt or shiny. The glass fronts have been highlighted with a coloured profile. Especially on the page before, one can recognize very well that when closed, the coloured accents shine through and result in an interesting pattern.

1

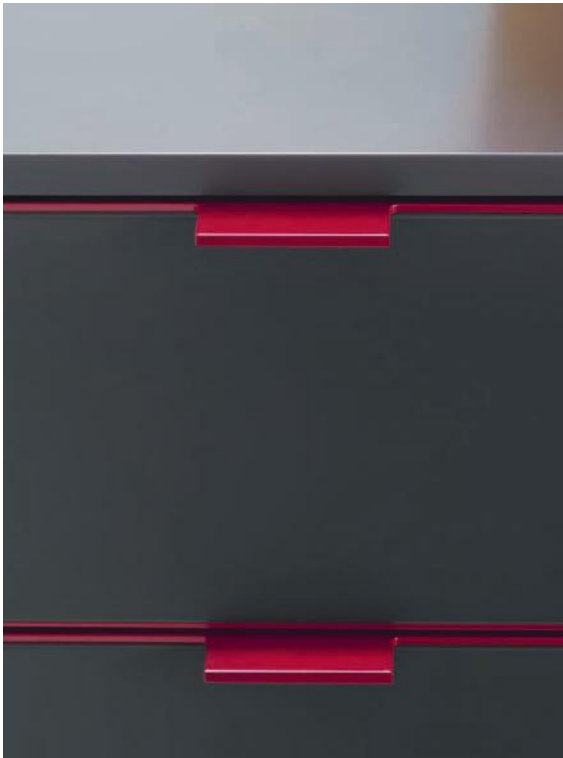

2

1

Handleless with the latest touch-technology: No matter where you push, the door opens.

2

Handleless with revolving profile. In alu, chrome or in the colour of your choice matt or high-gloss lacquered.

Asymmetric divided fronts.

2

Colour change in and outside as well as for the fronts. Every part can be lacquered in a different colour.

3

Open compartments are practical. The fine outlined profile in a different colour makes the design exciting.

4

Wall installation with thin wall-mounted shelves.

5

A special designed and functional element is the linkage in the flap. The inner drawer can be positioned variable.

6

For a good organization: CD/DVD shelf.

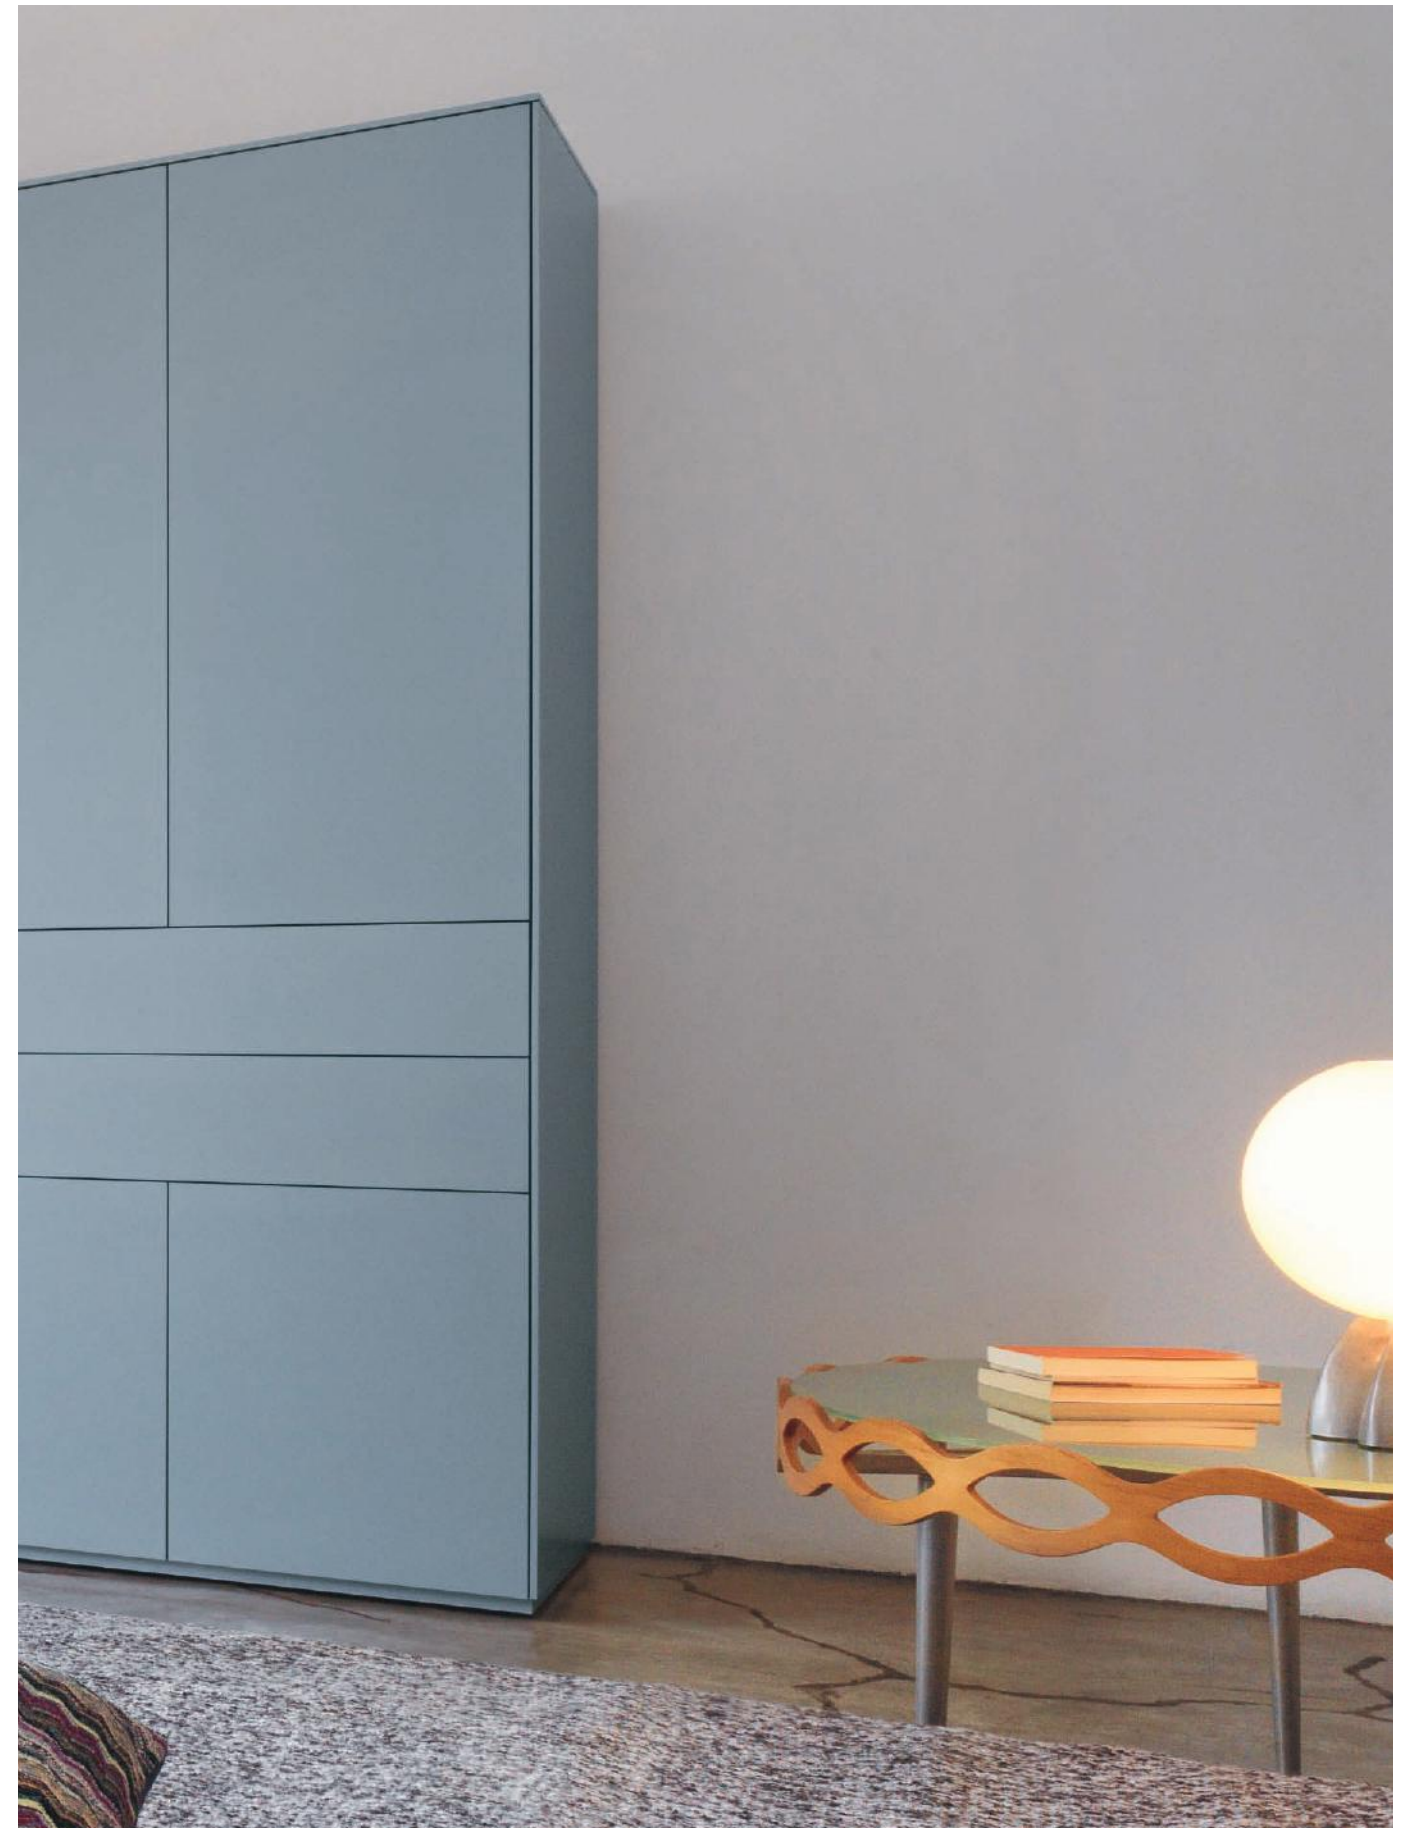

6

## LINE CABINET

„As you like it“ is a play written by Shakespeare – and at the same time the principle of the cabinet LINE: the division of the fronts is made according to your wishes. The height you like – can be built. The interior you like – can be made. The Line storage system creates a unique joint pattern by its doors, drawers and open compartments. You receive it either handleless or with two discreet handle versions (ledge and angular) which are available in all matt and high-gloss lacquers. As front versions doors, drawers and open compartments in many different heights and widths can be selected. Within one element the fronts can be arranged individually. Huge varieties are also offered by the widths, depths and heights. Like this small, tall, flat, deep or narrow cabinets can be planned which are ideal to be adapted to diverse rooms and spaces. For the interior shelves, inner drawers, pull-out shelves, clothing rails, clothing lifts, CD – and DVD storages, mirrors and lighting elements are for selection. Of course there are for all elements various material and colour finishes.

Divided doors ensure a special charm. And if divided on different heights, the joint pattern develops even more excitement. In the inside the design follows the function: In order to use the storage space to its maximum, we fill it up with pull-out shelves, inner drawers, shelves and even more. You or your rooms have special demands on the measurements? The Line system offers as well low heights starting from 125 cm. And if it needs to fit exactly we also offer height shortenings, corner and built-in solutions and much more.

LINE CABINET HANDLELESS H 235,1 CM W 287,2 CM

H 235,1 CM W 262,2 CM LEDGE HANDLE CABINET LINE

The fronts are available in a gentle matt-lacquer. Or in a reflecting high-gloss. Very puristic without handle. Or with various discreet handles which we present more detailed on page 166.

What is your plan?  
 Do you want storage  
 space in the office?  
 Or in the kitchen? Or in  
 the cloakroom? Or in a  
 place we did not think  
 of? Not only because  
 of the two different  
 depths, 60cm and 45cm,  
 Line is flexible. But also  
 by its drawers, doors,  
 open compartments.  
 In the picture we present  
 the cabinet in colour  
 mud with open compart-  
 ments in blu.

1

2

5

6

3

4

7

1

Handleless with the latest touch-technology: no matter where you push the front - the door opens.

2

Ledge handle. In all colours matt or high-gloss lacquered.

3

Angular handle. In all colours matt or high-gloss lacquered. Seamlessly milled out and easy to exchange.

4

Flexible inside lighting which offers many possibilities.

5

Very sophisticated: inside lacquered self-closing drawers with end damper.

6

For everyone who loves a good organization: inner drawers in different heights and can be arranged at will. For an optimal stowage use.

7

The height is used to the maximum by a manual clothing lift.

SHELF

170

## FLEX SHELF

The Flex shelf is similar to the Method acting: the game has to be dominated and repetitive. Flex system offer fixed shelf elements with a fixed division – which can be combined according to your wishes. Repeat the changing shelf elements and add other prepared elements. The re-produced emotion which Flex creates is joy. The boxes help to create this feeling as they can be inserted calmly or more wild. The flush-mounted version with the front harmonises the picture. But can also protrude in two different depths. In this way – ideally for huge wall-combinations - an outstanding design is created which one only realizes with a closer look. And one more special feature: Flex can also be wall-mounted.

FLEX SHELF H 216 CM W 300 CM

The boxes are fixed inserts in the shelf. Protruding boxes are always available in two different depths. The flush boxes always take place two-thirds of the shelf width. Interesting: the joint between the elements.

FLEX SHELF H 186 CM W 60 / 40 / 60 / 40 CM

OPEN INSERT SHELF FLEX

Flex is also available in discreet heights: The shelf elements (open or closed) in a height starting from 76 cm.

3

4

5

3

Fixed integrated office-solution.

4

Office- Desk with power- and internet connection.

5

Flex wall-mounted for a floating impression.

PU

RO

SHELF

188

## PURO SHELF

Imagine a master of acting: His play looks absolutely effortlessly. The audience would never know what is all behind this scenery – practice, performance, technique and energy. The true artist works hard so the recipients can fully enjoy. And it is the same with our star among the Piure furniture: the shelf Puro. Puro is delivered in single parts and only on site the shelf is built together by manual work. The making of the shelf is so clever that neither a single screw nor hinge is visible anymore. A further finesse by the single parts: there are no double side plates like for the so-called other corpus programs but tender sides which give the shelf airiness. But also the edges: these look fine and filigree although it seems to be impossible with the stability of the shelf. The explanation: The edges are beveled, means that the 19 millimeter strong plates are grinded to almost the half. And also the handleless fronts belong to the perfect play of Puro.

Puro reduces the shelf to the maximum: perfection. In the picture changing compartment heights are shown. And integrated office-solution which can make the working area disappear with elegance.

Single elements can be lacquered in different colours. Here a shelf-insert has been highlighted. Like this the glance is directed and the scene is set effectively. Behind flaps or like here behind doors and drawers, shelves can be built in. On this page and the one before you see changing compartment heights.

Do you see the beveled shelves which become stronger in the back ? Despite close-up only the front edges are visible. PURO seems airy and filigree. But you can feel the stability behind the shelf. Inserts protrude over one centimeter from the front and create a beautiful relief. The front is perceived like this three-dimensionally.

Changing compartment heights and the combination of different shelf widths: like this variety is created. And even small shelf racks receive an interesting look. The office- solution has an integrated socket with outlets and power supply.

1

2

1

The TV-solution has a pre-fixed rear panel. Behind, the wiring can be hidden. Depending on the height of the TV there might be more space for other media devices.

2

The office-desk with integrated solution for power and internet connection.

3

4

3

You have a choice between changing compartment heights (like here) and evenly distributed heights.

4

All inserts also available in oak and walnut.

## NEX PUR

Box

Box

Nex Pur is a selection of different versions of the Nex range (box, shelf, cabinet) – hence more favourable in price. Also luxurious and “Made in Germany” – but in a smaller choice. Also aesthetic with a delicate interplay of lines but because of the reduced variety quickly deliverable. The furniture which is only available in white, will be delivered within 14 days. Even Nex Pur opens up many possibilities as the boxes, shelves and wardrobes come in different lengths and widths which can be combined at your will. In a nutshell: Nex Pur is beautiful, attractive in price and quickly deliverable. The Nex Pur brochure we will send you on request.
