*- it's a tree story:*

TEAM 7

**WE WORK  
HAND IN HAND  
WITH THE WORLD'S  
BEST DESIGNER:  
NATURE.**

*- it's a tree story.*

## WE LOVE WOOD.

*Georg Emprechtinger,  
Owner and Manager of TEAM 7*

The starting point for sensible use of resources is a sustainably managed forest, which regrows continuously under the power of the sun. With the greatest care and attention to detail, we work the fine, European hardwood into unique pieces of furniture that share with you our love for wood in every little detail. Sustainability, responsibility and commitment to creating value in harmony with humans and nature shape the way we think and act at TEAM 7.

## *Grown for you.*

Because we grow our own 74 hectares of forest we understand the great value of wood and how important it is for sustainability. That's why we make all our furniture from deciduous trees that have been growing for decades in sustainable forestry. Finished exclusively with pure, natural oil, the wood surfaces of our furniture promote a naturally healthy and comfortable climate in your home. They are very easy to care for – and to restore, if necessary. This means TEAM 7 furniture retain their original and beautiful character for many decades.

## *Designed for you.*

*Your comfort is what drives us. That's why we aren't just satisfied with standards but try to incorporate more flexibility in our furniture. We work on visionary, sophisticated solutions to make your home even more comfortable. The thirty members of our R&D team are continuously working on innovative solutions, such as the synchronous extension of our nox table.*

*First the design and then the interior: our consultants plan according to your ideas and spatial possibilities. The model, size, wood type and colours are first planned to fulfill your wishes and only then do we start producing your customised TEAM 7 furniture.*

## *Made for you.*

*We do not make furniture to stock, but rather to fulfill our customers' wishes. Developed by designers, planned in accordance with your wishes by trained interior architects and realised by master carpenters: our award-winning solid wood furniture draws upon traditional Austrian handicraft skills. Each piece of furniture is a unique item, made to measure and requiring much skilled handwork. And the best thing about it – TEAM 7 furniture is available for all living areas.*

## *Open living.*

We make solid wood furniture for every area of your home. Thanks to the many different types of wood and our customisation service all our furniture can be combined and adjusted in any way you wish.

*magnum* table and cantilever chair

## *magnum*

A delightful feature of our **magnum**, the father of all extendable tables, is its patented **2soft** swivel technology. It only takes a slight and gentle motion to extend the table by 50 cm, two times 50 cm, or by 100 cm. The **magnum** cantilever chair made of patented Stricktex is the perfect accompaniment.

*Our connections don't just bring the wood together. They also unite traditional craftsmanship and state-of-the-art technology.*

## *magnum*

Slot and pin connections show the skilled craftsmanship of our carpenters and give the **magnum** table excellent stability. And they also have a strong appearance: they impressively highlight the nuanced characteristics of the solid wood.

## *magnum*

Our **magnum** cantilever chair is made of a breathable Stricktex material that provides the utmost comfort. It is available in eight colours, with or without solid wood armrests, and with a framework made of chromed steel or with a palladium finish.

THE ONLY WAY FOR  
IT TO GET MORE  
BEAUTIFUL IS FOR  
YOU TO SIT ON IT.

*- it's a tree story:*

## *cubus pure*

The occasional furniture and accessories of our **cubus pure** series are the perfect companions to the **magnum** table and chair ensemble. The main idea behind the design of **cubus pure** is the presentation of the high-quality wood or coloured glass fronts in a three-sided sheathing made of 4-mm thick coloured glass. We also fabricate the glass in the colour of your choice (based on NCS colours) to give you the most design options possible.

## HEIGHT, WIDTH AND DEPTH REDUCTIONS FREE OF CHARGE\*

\*for shelving and furniture bodies, excluding Lux, Home Entertainment and elements with functional fittings.

### *venetian oak*

The oak posts of the mystical lagoon get replaced regularly. They are marked by a shift in the tides and the growth of mussels: our venetian oak front makes an impression with the unique appearance of its wood and gives our **cubus pure** occasional furniture a very special look.

**WE TAKE  
THE MOST DIRECT  
ROAD TO  
ENVIRONMENTAL  
PROTECTION.**

*- it's a tree story.*

*Conservation  
of resources*

Shopping with the right attitude. Contrary to the current trends toward global sourcing, we have always relied on regional partners and suppliers. This ensures short transport routes and avoids unnecessary emissions of harmful substances.

*nox* table and bench

*Grow table, grow! With its smooth synchronous extension and the gentle, protective **2soft** swivel technology, our **nox** table can easily be extended by 60 or 120 cm.*

*One of the characteristic features of our **nox** table – and also a sign of superior craftsmanship for those in the know: the S-shaped edges of the solid tabletop.*

**OUR NATURAL OIL  
PROMISES  
ETERNAL YOUTH.  
SADLY, ONLY  
FOR FURNITURE.**

*- it's a tree story.*

The pleasant feel of our oiled wooden surfaces is a real treat and you are sure to be won over by their everyday practicality, from simple, daily cleaning to minor repairs. This is because even dents and scratches can be easily repaired with open pore treatment. Treated every 1-2 years with natural oil, the wooden surfaces will retain their beauty for a long time.

Your furniture can always be fully up to date in terms of flexibility as well: our follow-up purchase service ensures you have the option to buy any additions and extensions to your furniture elements for years to come.

## *nox*

No matter how you're inclined: Our **nox** bench always ensures maximum comfort. Because the shape, height and depth of the backrest enable different seating positions.

*magnum.* The **magnum** cantilever chair in leather with a palladium finish frame. A design classic that would get standing ovations – if it weren't so comfortable to sit on.

### *nox*

Special effects: **nox** occasional furniture offers an impressive setting for your objects. They feature elegant solid wood, dark palladium glass and focussed LED lighting. **nox** makes a powerful visual impression while being acoustically quiet: its dampened doors can be opened and closed easily, gently and almost without sound.

*Whether vegan, vegetarian, organic or paleo: TEAM 7 lets you set the same high standards for your dining furniture as for your food.*

### *nox*

The anchor point of your dining area: What makes our non-extendable **nox** table particularly impressive are its rounded edges and its strong, rustic table top. This has an especially powerful effect if wild oak and wild walnut woods are used. Natural features like knots, and striking grain patterns are characteristic of these hand-sorted wood surfaces. Solid wooden panels and metal slides guarantee the secure stand and bold appearance of the **nox** table.

## AN ALL-ROUNDER THAT WE USE FOR EVERYTHING.

*- it's a tree story:*

### *Workmanship*

Wood is a very special material. It is especially healthy, especially durable and especially pleasing to the eye. That is why working with this wonderful material is also very special: our designers and master cabinetmakers know just how to process it according to type and to make use of its advantages to optimum effect in different living areas. The entire production process is just as natural as the material. Working with wood means one thing to us above all: a special honour.

## *mylon/eviva*

To the table! Our **mylon** table is a lesson in organic contemporary design. Angled, flared table legs with rounded edges merge fluidly into the frame. Thanks to its finely crafted joint, the elegant table top seems to float above the base. **mylon** can be extended by up to 100 cm, turning from a cosy family table into a stately banquet table.

Our **eviva** chair, covered optionally in leather or fabric, is an example of perfect craftsmanship. Its feet seem to be connected "seamlessly" with the seat and back element.

## *mylon*

The accessories of the **mylon** line take up modern form language – whether in the cabinet with sliding doors or the high board with hinged doors. The fronts can be designed in coloured glass with a wooden strip or in solid wood with a coloured glass strip. They can also be assembled with a convenient drawer if desired.

*Typical for mylon. The flush-mounted Integro handle integrates perfectly into the strip made of solid wood or coloured glass, creating a handle-free look.*

## *cubus plus*

The **cubus plus** table can be extended by 50 or 100 cm with one or two panel inserts. It is an excellent fit with metal chairs thanks to the chromed surface of its steel frame.

SOMETIMES YOU JUST  
HAVE TO SIT DOWN FOR  
DISCUSSIONS ABOUT  
GOOD DESIGN.

*- it's a tree story.*

### *f1 cantilever chair*

The characteristic design element of our **f1** cantilever chair is its graceful base that evokes a closed loop. The backrest tapering towards the top and featuring a flexible shoulder zone and lumbar support offers very comfortable sitting – which can be enjoyed on either leather or fabric.

## *flaye*

Thanks to its revolutionary, intuitive **nonstop** pull-out technology, the **flaye** table can be quickly and easily extended by 100 cm in one single movement. So you can create space for four additional seats in next to no time. With the elegant leather frame, you can give the table an individual touch.

## *flaye*

The frame of the **flaye** table can be finished in leather or solid wood. The sophisticated design ensures that the organic curves blend together as a whole.

The matching **flaye** chair with its flexible backrest is particularly comfortable.

## *flaye*

A pleasure to hold. The precise and gently rounded edges of the **flaye** table top are enormously pleasant to the touch. You can also enjoy this along a rounded table top with the non-extendable **flaye** table.

## *Interior*

*Beautiful on the outside. Beautifully neat on the inside. The interior of our sideboards makes sure that everything has its place. You can choose different dividers, widths and depths for the elements – individually; according to your wishes.*

## *cubus pure*

Our **cubus pure** cabinets leave a lot of space for your creativity: Glass surfaces in the desired colours, different types of wood, various models in numerous heights, widths and depths – furnished with hinged doors, sliding doors and drawers.

## *aye*

Here everything is exactly at the right place:  
distinctive tapered backrest, its optional  
ergonomic armrests and the fine seams.

Our delicately upholstered chair **aye**, which  
received the interior innovation award, offers  
the ideal combination of design and comfort.  
This is further enhanced by the finest leather  
and high-quality fabrics from Kvadrat.

## *girado*

It's well-rounded – even in elliptical form.  
The elegant chair base made of shiny or matte aluminium characterises our **girado** table. It offers maximum legroom, which can even be expanded with the help of our comfortable **2soft** extension:  
Depending on the table shape, **girado** can grow by 50, 60 or 100 cm.

*The flexible interior of our occasional furniture is made of beech in its standard version.*

## *cubus*

Grand stage. Transparent glass panels inside the continuous glass fronts of the **cubus** cabinet reveal the solid wood in its interior. The illuminated edges of the glass shelving offer a grand performance space for your favourite objects.

*In addition to the standard colours selected by our designers, you can also request the glass for your occasional furniture in your favourite colour from the NCS colours.*

## *yps*

**yps**, he did it again. Just as in the rest of the **yps** collection, the designer Jacob Strobel has highlighted the Y as a design element of the bench. Its distinctive base immediately catches the eye and the Y-shaped, quilted upholstery shows the high-quality craftsmanship. The bench is available as a corner seat or a straight bench, in fabric or leather and with or without a backrest. A high-quality micro-pocket spring construction combined with cold foam provides superior comfort in all versions.

*The tapered edges of the impressive tabletop, made with the TEAM 7 three-layer technology, are a fascinating design detail of the yps table. Moved to the centre of the table top, the base offers generous legroom.*

## WHAT IS YOUR FAVOURITE COLOUR?

Choose the exact colour you desire for all glass surfaces.  
The entire colour range of the NCS colours is available to you.

*yps*

If the Y is missing from your alphabet: Just look under the table. Because the Y is the characteristic design element of our **yps** line. The table unites straightforwardness with numerous angles, which gives it a modern and dynamic look.

*Our cubus pure cabinets are not just available in different types of wood but also any conceivable glass colour according to the NCS colours.*

*aye with swivel base*

It's all about comfort: **aye** offers enormous comfort even as a swivel chair. Thanks to the special swivel and shock-absorbing mechanics, the chair gently rebounds when you sit down and automatically moves forward again when you stand up.

# WE ARE OUR OWN TOUGHEST INSPECTORS.

*- it's a tree story.*

The ingenuity of nature is the inspiration behind our constant drive to find new solutions for greater functionality and comfort. We implement them with our signature attention to detail and perfect craftsmanship, that's what makes our kitchens and furniture so extraordinary. Numerous patents and utility models underline the innovative power of TEAM 7. This means that, in the development phase itself, we comprehensively test the function, ergonomics, stability and safety of our products in our own laboratory, over thousands of cycles. TEAM 7 furniture is always made to order – with perfected technology and function.

## *loft*

A piece of traditional craftsmanship. Table legs with visible mortise-and-tenon connections and wood that appears to run over the edges of the table make our **loft** table a stunning centerpiece in your dining area. It comes optionally with our **2soft** swivel technology, which makes it possible to extend it on both sides by 60 cm each. A convenient flatware drawer is also optional.

*s1*

Wood at its best: Elegant wood and thick leather with unfinished edge seaming, a high quality seat surface and a flexible backrest make the **s1** so outstanding – in terms of comfort and aesthetics.

## *cubus*

Knock on wood. If this brings luck, the **cubus** sideboard with the flush-mounted sliding door is a truly fortunate choice – with its 25-mm thick top board of pure solid wood, which is typical for **cubus**.

## *cubus*

The glass of the door of the **cubus** display case runs right around the corner, offering a generous view of the illuminated interior.

Smoky glass, the darkened alternative to clear glass, makes the objects in the display case look particularly elegant.

## *cube pure*

The main design element in the **cube pure** living range is the delicate coloured glass that envelops the fronts like a mounted frame. The fine glass edges and recessed plinth make for a light, floating appearance. The glass sides can be easily replaced thanks to the attachment adapters designed and patented by our engineers. The modular **cube pure** body system can be planned flexibly according to your needs with 13 heights, 5 widths and 4 depths.

*The centrepiece of our **stern** table: a circular node from which eight identical rays branch out. With their ingenious design that alternates the up and down direction of the rays, they turn the table into a true work of art.*

## *cubus pure*

It's all a question of planning. Our wall units let you easily combine the **cubus pure** modular system, **cubus pure** Home Entertainment and **cubus** shelving. They can be suspended or rest on a base.

## AT HOME IN NATURE.

*- it's a tree story.*

### *Room climate*

You are treating yourself well in many ways when you choose furniture made of solid wood: wood makes a home snug and warm. With its open-pored surface, refined exclusively with pure natural oil, TEAM 7 furniture is breathable. Natural wood absorbs moisture and then releases it again. This promotes a healthy room climate and humidity level in your home. Our natural furniture is also anti-static, which is beneficial especially in case of dust allergies. The scientifically proven anti-bacterial effect of natural wood surfaces also has hygienic benefits.

## *Home Entertainment*

There is a good reason why guitars, violins and pianos are made of wood: A body made of pure, solid wood is the best way to ensure optimal sound performance. We used this principle in our uniquely high-quality Home Entertainment furniture. With **cubus** and **cubus pure**, we offer you advanced technological solutions from general use to home cinema and high-end audio. Whether it is part of a wall inside the home, an individual piece of furniture or a room divider – we plan our flexible furniture specifically for you and thus aesthetically and functionally combine two great passions: nature and music.

*Art for art: Our Home Entertainment furniture is made with a great deal of craftsmanship and absolute precision.*

## *Home Entertainment*

Our **cubus** and **cubus pure** Home Entertainment provides a superior sound experience in your own home. Because its solid wood body offers excellent audio conditions. Easily accessible cable management ensures that you won't see much of it – but hear a lot.

A special interior division offers sufficient room for all conventional sound bar systems.

# WE MAKE TREES MAKE MUSIC.

*- it's a tree story.*

Panoramic view. Our  **cubus**  room divider blends in harmoniously with any living space. Its stainless-steel TV column, which can rotate nearly 360 degrees, enables comfortable watching from any sitting position. The intelligent ventilation system and an organised, covered cable management round off this versatile solution. Many different types of wood, handles, an optional speaker flap with acoustic fabric in three colours and a range of glass colours let you design this unit as you wish.

*Sound system. Carefully fabricated from natural wood, the body offers perfect sound development. It provides plenty of space for your Home Entertainment systems and convenient wiring as well as enough space for the ideal ventilation of your devices.*

*lux*

This couch table has something to hide: Despite its reduced design and the thin material, it surprises with a concealed drawer for magazines, remote controls and much more.

## *cubus pure*

The wide range of planning options and tailored design opportunities will make all your interior and audio dreams come true. You can install your own cinema in your living room, for example: The **cubus pure** wall unit offers plenty of space for all devices. The impressive TV panel, which comes with effective LED lighting, routes and conceals the wiring of the TV.

*A lower level of the cable flap makes it possible to easily combine the TV panel and cubus/cubus pure Home Entertainment.*

## WE HAVE UNITED THE MARVELS OF TECHNOLOGY WITH THOSE OF NATURE.

*- it's a tree story.*

By the way, the design of your Home Entertainment furniture is as diverse as the movie programme: Select from different types of wood, glass colours and features. The hinged TV mount guarantees an optimal view from any sitting position. Drawers with flexible media dividers offer plenty of storage space.

*lift*

The height of the **lift** couch table can be smoothly adjusted from 35 to 71 cm. Whether you prefer it low as a tray or raised for a small lunch – **lift** flexibly adapts to all your needs at home.

*The variety of the cubus living range is nearly unlimited and offers aesthetically convincing and technically intelligent solutions for any wishes. Of course it includes nice details such as dampened sliding doors and drawers.*

### *c3*

Ironic. Strong material that is totally weightless. Thanks to its clever design, the solid wood of our **c3** couch table suddenly seems very light.

ONE THING  
ABOUT CUBUS IS  
ALWAYS THE SAME:  
IT'S ALWAYS  
DIFFERENT.

*- it's a tree story.*

The combinations from the **cubus** body and shelf programme offer lots of storage space for any need. The slot and pin connections in the frame and plinth along with the manually sorted solid wood fronts that are so typical for TEAM 7 highlight the superb craftsmanship of the entire cubus programme.

## *juwel*

A jewel for your home. Round, oval or triangular – no matter what shape, the **juwel** coffee table is a real gem. And this for a good reason: The design was inspired by the setting of a diamond ring. This look is underscored by the bevelled finish of the clear glass tops.

WE CREATE  
NOT ONLY  
FURNITURE,  
BUT ALSO  
VALUES.

*- it's a tree story.*

### *cubus shelf*

Our **cubus** libraries can be planned as desired in terms of width and height. Hinged doors, sliding doors, flaps and various glass colours within the shelving unit ensure that you have many design options. Convenient, cushioned sliding shelves offer space for additional books. And the space behind it can be used as a TV alcove, for example.

## *sidekick*

**sidekick** – that is a coffee table and side table in one. Depending on how the table is set up, its innovative shape enables different uses. In other words, this table offers the perfect solution, whether you want to check Facebook or take a coffee break. To change its function, simply tilt.

*treeO*

What is special about our award-winning **treeO** side tables: the round recess in the table tops made of white marble or solid wood. It reveals the end grain of the table legs. Their elegant connection appears like the branches of a treetop.

*Two convenient heights and its mobility make the treeO side table the perfect centrepiece for all areas of the home.*

# WE SET AN EXAMPLE WHEN IT COMES TO THE ENVIRONMENT. GUARANTEED.

*- it's a tree story.*

The Austrian ecolabel is a mark that guarantees healthy living – free of harmful substances. Tested by an independent testing body according to strict standards, this mark confirms that our furniture is not harmful to the environment or to health. It confirms that the wood used in our furniture comes from sustainably harvested forests and promotes a healthy living environment due to its special surface treatment. The Austrian ecolabel is also a quality mark for high-quality products that excel due to their long life, suitability for use as well as safety and comfort in daily use.

The EMAS certificate provides proof of our sustainable production methods, efficient use of resources as well as compliance with applicable environmental laws. As an ISO-certified company, we are committed to the implementation of international standards and the associated requirements related to the environment, quality and safety.

Sustainability is an important factor in all of TEAM 7's activities. That's why we make sure that we use environmentally-friendly production methods and materials – also for making this catalogue. We aim to save resources and use materials that are free from harmful substances. The paper used for this catalogue comes from forests that are managed on an environmentally, economically and socially sustainable basis. We have used only renewable energy and pure vegetable-oil-based printing ink for the print production.

## *atelier*

This tree is still growing. Our **atelier** desk made of solid wood is height-adjustable from 68 to 81 cm, thus allowing people of virtually any height to work ergonomically. The inevitable cables conveniently disappear in the cable outlet and integrated cable trunking.

## *cubus writing desk*

It looks like an elegant dresser when it is closed, but when open, our **cubus** writing desk really shows what it has to offer: the extendable desk top, a cleverly stowed keyboard, writing utensils and – in the version with a monitor lift – even a smoothly height-adjustable monitor. Its lower section is practical too: A computer, printer and folders can be stowed behind the hinged doors.

*cubus pure* entry hall

*Entry hall solutions that integrate completely into the room architecture offer not just a clear, minimal design but also enough storage space for clothes and shoes.*

**THE PERFECT  
WELCOME  
TO ANYONE WHO  
WELCOMES PERFECT  
CRAFTSMANSHIP.**

*- it's a tree story.*

Whether it's glass fronts in your personal favourite colour or wooden surfaces sorted by hand – you would be hard pressed to find a more beautiful welcome to your home than that of our customised entry halls. And practical details, such as flush-mounted folding hooks, keep your hands free for a warm hug.

*entry hall*

Stylishly welcome. Our **cubus** and **cubus pure** entry halls offer a warm welcome to you and your guests.

Choose from numerous elements and versions and let us design your entry-hall furniture so that it perfectly meets your needs, space and taste.

## *entry hall*

Offering a variety of heights, widths and depths, the extensive choice of elements and storage systems of the **cubus** and **cubus pure** entry halls invite you to plan the space with virtually no limitations and find a stylish solution for any entry situation – we can even provide custom-made solutions.

## *entry hall*

A place to arrive and take a deep breath. Our entry halls made of pure solid wood give your entrance area a pleasant atmosphere and create a welcoming first impression. Glass fronts in your desired colour\* give the "calling card of your house" a personal touch.

\*see available colours on NCS colour charts

*Places for keys, mobile phones and sunglasses are basic features of the perfect wardrobe.*

Block of solid wood

# WE ARE DEDICATED TO CREATING FURNITURE THAT'S JUST AS UNIQUE AS WOOD ITSELF.

*- it's a tree story.*

## *Sustainability & design*

Even if it sounds unconventional at first: our sustainability already starts with the design. Because wood is naturally robust, resilient and durable – in contrast to so many trends. This is why our designers are carefully considering what the trends for living are that will stand the test of time and have what it takes to become classics. After all, the design of our furniture is just as timeless as the material from which it is made.

SINCE  
1959

## *our types of wood*

*We make all our solid wood furniture from the wood of leafy green trees  
grown in controlled and sustainable forestry.*
